### PUBLICATIONS & PRE-PRINTS

- ICL Improves Compositional Understanding of VLMs: Research published ICML Workshop, 2024. Analysed and evaluated generative and contrastive-based VLMs such as CLIP, LLaVa and cogVLM on compositionality-based benchmarks (ARO, winoground, sugarcrape). We find that using task-specific few-shot examples can significantly improve the compositional understanding capabilities of VLMs, attaining a 5% enhancement.
- 'Explaining RL decisions with trajectories': A Reproducibility Study: Research published TMLR, 2024. Reproduced and extended 'Explaining RL decisions with trajectories' from Adobe Research. Investigated new methodologies by changing the clustering algorithm and by encoding trajectories through Hugging Face based Transformers. Obtained better visual cluster representation.
- Vocabulary Reduction and Contrastive Decoding in LLMs: Research to be submitted, 2024. Modified existing early-exiting techniques and applied contrastive decoding to encoder-decoder Large Language models such t5. By employing vocabulary pruning technique we achieved 100x improvement in FLOPs, while retaining almost all performance.

#### EDUCATION

# University of Amsterdam

- MSc in Artificial Intelligence; GPA: 4.0/4.0 (8.3/10)
  - Relevant Courses: Foundation Models, Deep Learning 1 & 2, Computer Vision, Natural Language Processing, Information Retrieval, Machine Learning 1.

## Università Commerciale Luigi Bocconi

BSc in Mathematics and Computing Sciences for Artificial Intelligence; GPA: 3.6/4.0 (99/110) Sep 2020 - July 2023

- Thesis: Analysed Generative Adversarial Networks and Recurrent Neural Networks with time-series financial data to determine future prices of stocks.
- **Relevant Courses:** Machine Learning, Mathematical Modelling for Finance, Mathematical Analysis 1,2 & 3, Physics 1 & 2, Statistical and Quantum Physics, Optimization Algorithms, Programming.

### University of Sydney

Exchange Semester in Applied Mathematics and Computing Sciences; GPA: 3.6/4.0 Feb 2023 - July 2023

- Scholarship: Selected by merit and received a full ride scholarship of 26,500 A\$.
- **Relevant Courses:** Stochastic Processes (Adv), Big Data and Data Diversity (Adv), Deep Learning

### EXPERIENCE

eBay	Amsterdam, The Netherlands
Applied Scientist	July 2024 - Current
• MLLMs: Intern on Multimodal LLMs research and development for data, architecture and pre-training.	
Aindo	Milan, Italy
Machine Learning Engineer	June 2022 - Sep 2022
$\circ~\mathbf{VAEs}:$ Learned PyTorch library and developed Variational Auto-encoders	from scratch.
BAINSA	Milan, Italy
Co-Founder	Jan 2022 - July 2023
• AI association: Founded first Artificial Intelligence association at Boccon	i.

• Events: Spread awareness & perception on AI's applications through events held inside and outside the university.

• **Partners**: Main Partners include Bending Spoons, Vedrai and Insitute Europia.

Sep 2023 - Sep 2025

Sydney, Australia

Amsterdam, The Netherlands

#### Milan, Italy

# Projects

- Machine Learning for Breast Cancer Cells analysis: Project winner of AI-Lab competition, 2022. Utilized Unsupervised and Supervised ML methods (Tree based methods and Deep Neural Network) to analyse breast cancer cells and capture interactions between them. Detected with a success rate of 95% Hypoxic vs Normoxic cells. Presented the project at the University of Oxford Oncology Department. Supervised by professor Francesca Buffa.
- CLIP based visual prompting, Transfer Learning CNNs: University project, 2023. Learned different Visual prompts through CLIP and adapted network to different datasets.
- Deep Generative models and Transformer based models: University project, 2023. Implementing causal self-attention in gpt-2 and developed Variational Auto-encoders and Adversarial Auto-encoders from scratch in PyTorch.
- Content-Based Retrieval Ranking and Re-Ranking Systems: University project, 2023. Applied Neural-IR ranking and re-ranking methods through Cross-Encoder, Sparse and Dense Encoders with BERT Transformer. Achieved a 4% enhancement in performance when combining Dense and Cross-Encoders together.

### Scholarships & Awards

- Scholarship: University of Sydney, full ride scholarship of 26,500 A\$.
- Award: University of Oxford, Università Commerciale Luigi Bocconi. AI-Lab Competition Winner, presented the project at Oncology Department at University of Oxford, received travel reimbursement. Supervised by professor Francesca Buffa.
- Scholarship: Mario Negri Foundation, scholarship of 800\$.

## PROGRAMMING SKILLS

- Languages: Python, R, SQL, LaTeX, C (Beginner)
- Libraries: Pytorch, OpenCV, SciPy, Pandas, NumPy, Matplotlib, Scikit Learn, CLIP, Transformers

### VOLUNTEERING

- Class Representative: University of Sydney, 2023. Representing my fellow students within the faculty whilst talking with professors to solve problems of the class.
- Technical Consultant ML Engeneering: *BSI Bocconi Build Sustainable Innovation*, 2021-2023. Implemented ML & Statistical based solutions for Companies. Applied Data analysis techniques to costumer provided datasets.
- Institute Representative Head Student: Liceo Scientifico G.B. Grassi Latina, 2019-2020. In my senior year I was appointed to be the Head Student for my High School representing more than 1500 students. During this period I worked together with the Head Master to manage the school's problems and improved my public speech abilities.

I authorize the treatment of my personal data according to  $\mathrm{GDPR}(\mathrm{EU})$  2016/679
